"THE NURSERIES,"
KNUTSFORD, CHESHIRE.

The Nurseries, Knutsford, Cheshire.

WE beg to submit our **Priced and Descriptive Catalogue** of Roses, Fruit Trees, Conifers, &c., for the coming season, which has been carefully revised.

ROSES.—To those desirous of planting Roses most likely to succeed, we would point out the importance of obtaining plants raised so far north and in such an exposed position, as they remove with safety and are sure to give entire satisfaction.

It would be well if our customers when selecting their Roses would mark a few more kinds than required, as occasionally when the season is advanced we are sold out of some varieties.

FRUIT TREES, &c.—Of these we have an extensive stock, comprising the best varieties in cultivation. Also a choice selection of Hardy Flowering Shrubs and other Ornamental Deciduous Trees, amongst which are extra-sized specimens of Limes, Horse Chestnuts, Elms, Purple Beech, Sycamores, Oaks in variety, &c.

CONIFERS, EVERGREENS, &c.—We flatter ourselves that our collection of Specimen Hardy Evergreens is the most choice and select in the country; while our plan of frequent transplanting—to which we pay great attention—renders the removal of even the largest trees easy and safe. We are in a position to offer every advantage to purchasers; especially when large quantities are required, it is usual with us to make quotations at greatly reduced prices.

DELIVERY.—We deliver, free of charge, full cart loads of trees within 20 miles of Knutsford.

TERMS.—5 per cent. discount allowed off Invoices paid within one month, 2½ per cent. off quarterly a/cs, half-yearly a/cs nett.

A. K. WILLIAMS.

General Collection of Roses.

All these sorts we cultivate, and are arranged in alphabetical order. The section to which each belongs may be easily ascertained by referring to the column headed Class. Standards and Half-Standards can be supplied of the varieties priced.

A list of varieties suitable for Climbing is given on page 10.

NEW ROSES OF 1898.

The following we have selected as being the best of the newer roses of recent introduction, and may be relied on as being of good quality.

	Each—s. d.
Aurora, H.T. (Wm. Paul & Son), centre rich salmon-pink, shaded paler towards outside, large, full and imbricated; very fragrant and free	7 6
Beryl, T. (Dickson), very deep golden yellow, buds long and pointed and highly perfumed; excellent for button-holes; robust and vigorous habit	7 6
Daisy, H.T. (Dickson), rosy pink, suffused silvery pink, large, full and perfectly formed, very fragrant; of free growth, and very free flowering	10 6
Killarney, H.T. (Dickson), flesh, shaded white, suffused pale pink, buds long and pointed, a beautiful flower of great merit; robust and free, flowering continuously	10 6
M. Ada Carmody, Tea (Wm. Paul & Son), ground colour ivory white, tinted and edged pink, centre tinged yellow; large and full; fine long buds	7 6
Meta, T. (Dickson), crushed strawberry colour, suffused with saffron, base of petals copper colour, buds long and pointed, very fragrant, of robust habit and very free	7 6
Miss Willmott, Single Tea (Paul & Son), a copper-coloured seedling from L'Ideale, very pretty and effective	3 6
Mrs. Frank Cant, H.P. (F. Cant), clear pink, edge and back of petals silvery white, shaded deeper at base; large, full, and perfectly formed; very free and vigorous	7 6
R. B. Gater, H.P. (Cooling), bright magenta carmine, beautifully shaded; flowers large, with high centre, petals reflexed; a fine exhibition rose; vigorous, early and free flowering	7 6

CONIFERÆ.

SPECIAL QUOTATIONS FOR LARGE QUANTITIES.

Our Stock of Conifers is very extensive. All are grown in the open ground, and are thoroughly healthy and well rooted. Having been recently transplanted, they can be removed with safety.

Thousands of Bushy and Well-furnished Plants, varying from 6 to 18 inches, are grown suitable for Window Boxes, Winter Bedding, and for Potting for Conservatory Decoration. 4/- to 12/- per dozen.

Larix (Larch)—		leptoclada	1/0 to 3 6
Europaea. See Forest Trees, page 21		obtusa	1/0 to 2 6
Kampferi (Golden Larch)	5/0 to 21 0	One of the finest of evergreen Conifers, forming a tree of large dimensions, very distinct in colour and habit; stands the smoke of large towns with impunity.	
Libocedrus (Incense Cedar)—		obtusa aurea	2/6 to 5 0
Chilensis	1/6	compacta	1/0 to 2 6
decurrens (Thuja gigantea)		nana	1/0 to 3 6
Picea—		aurea	1/6 to 2 6
Amabilis	5/0 to 7 6	pisifera, 2 to 3ft.	1 6
Balsamena (Balm of Gilead)	1/0 to 3 6	3 to 4ft.	2/0 to 3 0
concolor	2/6 to 3 6	4 to 5ft.	3/0 to 5 0
grandis	1/6 to 3 6	5 to 6ft.	5/0 to 7 6
lasiocarpa (Lowii)	2/6 to 7 6	large specimens	10/6 to 30 0
nobilis	2/6 to 5 0	An exceedingly fine variety of rapid growth with long plume-like branches.	
Pinsapo	2/6 to 5 0	pisifera aurea	1/0 to 3 6
The above two should be in every collection.		Habit like above, but of a bright golden yellow; makes a splendid specimen.	
Veitchii	3/6 to 10 6	plumosa—	
Pinus Austriaca (Austrian Pine)—		9 to 12in., per 100, 20/-; per doz. 4/0	
For small sizes, see Forest Trees.		1 to 1½ft.	25/-; 6/0
1½ to 2ft.	per doz. 6/0	18 to 24in.	per doz., 12/0
2 to 2½ft. (transplanted)	9/0	24 to 30in.	18/0
2½ to 3ft.	15/0	2½ to 3ft.	24/0
3 to 4ft.	30/0	3 to 4ft.	30/0
For hardness and quickness of growth there is nothing to surpass this Pine. For the back of shrubberies, and in any position where a thick screen is required, this variety is invaluable.		4 to 5ft.	35/0
		5 to 6ft.	5 0
		specimens	7/6 to 10 6
		alba variegata	1/0 to 2 6

Coniferæ—Continued.

Retinospora (Japanese Cupressus)—		Each—s. d.
plumosa aurea,		
6 to 9in.	per doz.	6/0
9 to 12in.	"	9/0
12 to 18in.	"	12/0
18 to 24in.	"	20/0
2 to 2½ft.	"	24/0
2½ to 3ft.	"	30/0
3 to 4ft.	"	5/0 to 7 6
larger specimens	"	7/6 to 10 6

A lovely bright golden variety, retaining its colour all the year round, very much used for pot work, winter bedding, &c.

squarrosa, 9 to 13in.	per doz.	6/0
12 to 18in.	"	9/0
18 to 24in.	"	15/0

A pretty and free-growing sort, with recurved branches of a fine glaucous hue.

Salisburia adiantifolia (Maidenhair Tree)	1/6 to 3 6
--	------------

Savin. See Juniperus.

Sequoia gigantea. See Wellingtonia.

Thuja, Siberica	1/6 to 3 6
Vervœnsana	1/0 to 2 6

Thujopsis borealis —Cupressus Nutkensis)		
1½ to 2ft. doz. 9/-		
2 to 3ft. doz. 12/-		1/6 to 3 0
3 to 4ft.		2 6
4 to 5ft.		3 0
5 to 6ft.		5 0
larger specimens		7/6 to 10 6

One of the finest Conifers grown; first-rate habit, good growth and perfectly hardy.

borealis compacta	1/6 to 3 6
alba variegata	1/6 to 3 6
aurea variegata	1/6 to 5 0

dolabrata, 9in. to 12in., per doz. 6/-	
12in. to 18in.	1 0

fine specimens	3/6 to 5 0
--------------------------	------------

dolabrata variegata, 9in. to 12in. doz. 9/-	
---	--

These have been tried several winters, and being uninjured by the frosts, may be planted in almost any situation. Their distinct habit of growth and pleasing green colour render them general favourites.

Taxodium distichum (Deciduous Cypress)	1/6 to 3 6
---	------------

Taxus (Yew)—	
edpressa	3/6 to 5 0

A very distinct species, with short dark green leaves and scarlet berries.

Taxus (Yew)—		Each—s. d.
baccata (English Yew)—		
1 to 1½ft.	per 100	30/0
1½ to 2ft.	"	40/0

Dwarf Alpine Rhododendrons.

These are well adapted for planting on Rockwork, or for edging of beds of Rhododendrons, Evergreens, &c.

Rhododendron <i>ferrugineum</i>				} 6/- to 9/- doz.	Rhododendron—				} Each—s. d.
<i>hirsutum</i>		<i>Præcox</i>	
<i>variegata</i>	<i>rubra</i>	1/0 to 1 6	
<i>odorata</i>	<i>Daviesi</i> , fine for pots..	2/6 to 3 6	
<i>Wilsoni</i>						

Rhododendron Ponticum.

The Rhododendron Ponticum, above all Evergreens, is particularly recommended to the attention of those engaged in planting Game Covers, Shrubberies, &c., as it will thrive in any description of soil, is perfectly hardy, and in most rigorous seasons is never injured by hares and rabbits; in fact, is quite indispensable when permanent cover is required.

<i>ponticum</i> , 1 to 1½ft.	35/0 100	} These are all well-rooted and bushy plants, grown on loam.
" 1½ to 2ft.	9/0 doz. 60/0 100		
" 2 to 2½ft., very bushy	15/0 " 100/0 100		

Larger sizes, prices on application.

Seedling Rhododendrons.

We have a very fine strain of Rhododendrons, the produce of carefully fertilised seed, saved from the best hardy kinds, raised especially to sell as seedlings of high-class, at a low rate. They may be relied on to produce all the colours usually found in Rhododendrons, and to be superior to many of the named varieties.

Fine bushy plants, 12 to 18in.	10/0 per doz.; 70/0 per 100
" " 18 to 24in.	15/0 "
" " 2 to 2½ft.	30/0 "

Special Mixture of Lawn Grass Seeds For Lawns, Tennis Courts, Cricket Grounds, &c.

This Mixture is composed only of the finest Dwarf Evergreen Grasses, all the coarse rough growing varieties being carefully excluded. Lawns and Grass Plots require to be sown thickly to form a close fine bottom quickly, and the ground carefully weeded until the Grasses are well established. Frequent rolling is essential.

Per lb. 1/-, per bush. 18/- . EXTRA FINE, per lb. 1/3; per bush. 22/-

Culinary Roots and Plants.

Artichokes , Globe per doz. 6/- to	12 0	Horse-Radish , for planting per doz.	2 0

		Weigelia. See page 19.	
		Wistaria sinensis	1/6 to 3 6
		" " alba	1/6 to 3 6

Clematis.

For covering large spaces quickly, the Clematis stands unrivalled, and for massing in large beds many of the varieties are particularly well adapted, making a grand effect when in flower during the summer season. They may be planted out at almost any time; the ground should be deeply trenched and well manured (the soil cannot be made too rich) to induce the plants to grow freely. After they have done flowering for the season, the Jackmanii and Viticella sections should be cut down within 9 to 12 inches of the ground. The Patens and Florida require no pruning; those of the Lanuginosa moderate, but not too close pruning. During November fork in a good dressing of manure and leaf-mould.

*Those marked * are most suitable for bedding.*

Selections left to C. & Sons, 9/- to 12/- per doz. Purchaser's Selections, 12/- to 18/- per doz.

NAME.	SECTION.	COLOUR.	TIME OF FLOWERING
*Alexandra Jackmanii ..	pale reddish-violet, free blooming July Oct.
Anderson Henryi Lanuginosa ..	creamy-white, large flowers June Oct.
Blue Gem Lanuginosa ..	pale blue, eight petals June Oct.
Duchess of Edinburgh	.. Florida ..	the best of all, double pure white, sweet scented June July
Duke of Edinburgh	.. Patens ..	violet purple June July
Fairy Queen Lanuginosa ..	a very attractive variety, flowers very large, sometimes measuring nine inches across; pale flesh, with a pink bar in the centre of each sepal, shaded purple at the base June Oct.
*Flammula Jackmanii ..	white, sweet-scented July Oct.
Fortunei Florida ..	rosette form, creamy white, sweet scented June July
*Gipsy Queen Jackmanii ..	rich bright dark velvety purple, a very attractive variety July Oct.
Grand Duchess Lanuginosa ..	white, very large July Oct.
*Hybrida Splendens	.. Jackmanii ..	fine velvety blue July Oct.
Indivisa Lobata Montana ..	white Anemone-flowered, and ornamental evergreen creeper, rather tender, but well deserving greenhouse culture Jan. May
*Jackmanii Jackmanii ..	deep violet-purple flowers, produced in masses; one of the best, especially for bedding July Oct.
*— alba Jackmanii ..	the white form of this most popular and free-flowering variety, faintly tinted with pink, but become pure white with age July Oct.
*— Superba Jackmanii ..	this has proved, with us, in every way a superior variety in form and colour to the old variety Jackmanii July Oct.
Lady Caroline Neville	.. Lanuginosa ..	bluish white, mauve bars, very fine June Oct.
Lanuginosa candida	.. Lanuginosa ..	greyish white June Oct.
Lucy Lemoine Florida ..	white, rosette-formed, pale yellow anther June July
*Madame Edouard Andre	.. Jackmanii ..	bright velvety red, very effective and free flowering (Red Jackmanii) July Oct.
*Madame Grange Jackmanii ..	crimson violet, tinted with red in the centre, most distinct and beautiful July Oct.
Marie Lefebvre Lanuginosa ..	delicate mauve, with a deeper mauve-coloured bar June Oct.
Miss Bateman Patens ..	white, cream band June July
montana Montana ..	white Anemone-like, very hardy May July
Mrs. Hope Lanuginosa ..	satiny mauve, bar deeper tint, splendid June Oct.
purpurea elegans Lanuginosa ..	flowers large, fine form, deep violet-purple, well contrasted by its light-coloured filaments and pinkish-brown anthers; said to be the best of its class ever offered June Oct.
*rubella Jackmanii ..	rich claret-purple, distinct, and very free blooming July Oct.
*rubro violacea Jackmanii ..	maroon, shaded violet July Oct.
Snow White (Smith's)	.. Jackmanii ..	fine pure white, the same size as Jackmanii, very free flowering July Oct.
Star of India Jackmanii ..	violet-purple, red bars July Oct.
Thomas Tennant Lanuginosa ..	very pale rose, changing to Ivory white, of good substance and fine form June Oct.
*velutina purpurea	.. Jackmanii ..	blackish-mulberry, distinct July Oct.
Venus Victrix Florida ..	delicate lavender June July

Mushroom Spawn.

We would call your special attention to the quality of our Mushroom Spawn. It is made for us by one of the most reliable manufacturers, and supplied at frequent intervals, which ensures the supply of good and fresh spawn.

The following testimonial is one out of hundreds we receive annually.

TO MESSRS. CALDWELL AND SONS,

GENTLEMEN,—Having used your Mushroom Spawn for two years, I must say it is the best I ever had. It far surpasses any other make I have tried and grown side by side at the same time. In four weeks from the time of spawning, the beds were simply covered with Mushrooms of excellent quality.

THE GARDENS, TATTON,
October 15, 1897.

GEORGE CLIFFE,
Gardener to Earl Egerton, of Tatton.

TO GROW MUSHROOMS.

Mushroom Beds are best made under cover—under the benches of a greenhouse or in sheds will do, but a dark room or cellar, where the temperature can be maintained at 50 to 60 degrees, is the best. The beds should be made from November to March, as it takes about two months for them to bear. Procure soil from some old pasture and mix thoroughly with double its quantity of fresh horse manure and make into bed of say four feet in width. Put down a thin layer and pound or stamp it hard, and repeat layers till bed is about 8 inches thick. It will soon become very hot, but let it cool down to 75 or 80 degrees. Then make holes, say a foot apart, and put in the spawn, two or three pieces the size of a walnut in each hole. Cover the holes, and press the soil smooth. Let the bed remain in this condition about twelve days, then cover the whole bed with 2 inches of fresh loam, and over this place 4 or 5 inches of hay or straw, and the work is done. If the temperature is right, in six or eight weeks Mushrooms may be expected. The bed will continue bearing twenty to thirty days. After the first crop is gathered spread over the bed an inch of fresh soil, moisten with warm water, and cover with hay as before. Success in Mushroom cultivation almost wholly depends on maintaining a high and uniform temperature.

PER BRICK, 6d.; PER BUSH., 5/-

Spring Flowering Plants, for Present Planting.

Alyssum Saxatile Compactum, 1/6 per doz.
Arabis Alpina, 1/6 per doz.

Sweet Violets (*Viola Odorata*).

We have a very fine collection of sorts, including all the very best. The plants now offered are all strong, adapted for planting at once to flower this Spring. All are good plants in capital condition, which will yield beautiful bloom the first season. The double varieties are marked *.

6d. each; 5/- per dozen, except those priced.

Devoniensis, dark blue, very sweet.

***De Parme**, lavender blue, large double flowers, very free, good winter bloomer.

Lady H. Campbell, an improved Neapolitan, very early.

***Marie Louise**, very large double flowers of lavender blue and white, a splendid winter-blooming variety, 9d. each; 6/- per doz.

***Neapolitan**, lavender blue, large double flowers, very continuous bloomer, an extra fine winter blooming variety. 9d. each; 6/- per doz.

***New York**, mauve-coloured, one of the best.

The Czar, a general favourite, deep violet, large flowers, produced in great profusion, very fragrant, and with very long stems.

The London, fine blue.

Victoria, large single deep blue flowers on long stems, one of the best of the market varieties.

Victoria Regina, immense flowers of a rich violet blue, very fragrant, well thrown up above the bold foliage.

Wellsiana, large, deliciously scented, and of a deep rich purple; the foot-stalks are long and wiry, supporting the flowers well above the close compact foliage; it is extremely hardy, the first to flower in the autumn, and holds out to the last in spring.
