CALDWELL'S TESTED SEEDS.

In presenting our Post-War Catalogue of TESTED SEEDS, we desire to thank most sincerely our large number of old friends who favour us from year to year with a list of their requirements for the garden. A sure proof of our claim that our Tested Seeds are reliable. At the same time, we wish to say "thank you" to the army of war-time Gardeners who have come to us for their supplies. However they may be inclined to relax their efforts now that hostilities have ceased, unfortunately, the food situation will not allow it. We all know that it is more serious than ever, so it is up to everyone to produce as many vegetables as possible. We can assure you all that we shall continue to merit your support in the future by supplying only the very best stocks available. In compliance with the Paper Control Order we still have to restrict the number of pages in our Catalogue, but our customers will find mostly all the varieties they have been used to having, will be at their disposal. SEE SPECIAL NOTE ABOUT FLOWER SEEDS ON PAGE 13. Please send your orders as soon after receiving this catalogue as it is possible, to enable us to get the seeds into your hands before you require to sow them.

TERMS OF BUSINESS, &c.

PRICES.

In the event of conditions arising outside our control, prices in this Catalogue may have to be advanced without notice.

SUBSTITUTES.

Because of the scarcity of some kinds of Vegetable and Flower Seeds this season it may be necessary, as the season advances, to send substitutes. We shall take the liberty of doing this, sending the nearest possible variety unless we receive instructions to the contrary.

FREE CARRIAGE OF SEEDS.

All Seeds are sent Carriage Free by Rail or Parcel Post to any part of the United Kingdom.

TERMS OF PAYMENT.

All Accounts are due (net) at the end of each current quarter. For cash with order, or when payments are made within 14 days from date on invoice, a discount of 5 per cent. will be allowed from amounts of not less than £1. Special quotations, net. Correspondents who may be unknown to us are respectfully requested to send remittance with order, or give a reference.

QUALITY OF SEEDS.

Caldwell's Seeds have been carefully grown, cleaned and tested, but it must be clearly understood that we give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter connected with Seeds supplied by us, beyond the declaration required in accordance with the "Seeds Act, 1920," and will not be in any way responsible for the crop. The giving of an order to us constitutes an acceptance of these terms by the purchaser. If the purchaser does not accept the goods on these terms they are at once to be returned. We also do not undertake any responsibility for loss by frost or other adverse conditions during or after transit of Seed Potatoes.

ORDER SHEET.

It would be a great convenience to us if Customers, when sending their orders, would use the Order Sheet, which accompanies this Catalogue, being careful to fill in their Name and Address, as frequently Orders are received without either.

RETURNED PACKAGES.

SACKS, BAGS, HAMPERS, MATS, &c., when returned promptly in good condition and Carriage Paid are allowed in full, but it is absolutely necessary that an Advice Note be sent us when they are despatched, and that the name and address of the Sender be written on the label.

CATALOGUES.

We are now permitted to send our Catalogue of Seeds, Potatoes, Fertilisers, etc. without application to all customers who placed orders with us during the past two seasons. Any of our friends and new customers who do not come under this heading, we beg of them to make an early request and a copy will gladly be sent post free at once. For Nursery, Herbaceous and Alpine Catalogues customers must please enclose One Penny for each copy, in accordance with the provisions of the Control of Paper (No. 48) Order.

RECOMMENDATIONS.

We are sincerely grateful to the numerous Customers who kindly recommend our Seeds, etc., and we shall be pleased to post a Catalogue to any friend of a Customer on receipt of name and address, subject to the Government restrictions in force at the time of application.

General
List of .

Vegetable Seeds.

All Seeds offered in this Catalogue have been tested in accordance with the provisions of the Seeds Act, 1920. Germination and purity are not less than the minimum percentages authorised by the Seeds Regulations.

GARDEN PEAS.

Peas do well in any good garden soil, but thrive best in ground deeply trenched and manured for a previous crop. Sow about an inch and a half deep, in double rows 6 or 8 inches apart, with stakes between the rows for support. It is also a good plan to sow in trenches wide apart, with some other crop between. By this means both sides of the rows get the full advantage of light and air, while the trenches are convenient for watering in dry seasons. Sow early sows in February, and again towards the end of the month for succession. The first week in March a general sowing should be made of the second early and main-crop varieties, and continued once a fortnight till the beginning of July.

THOSE MARKED WITH * ARE WRINKLED VARIETIES.

PEAS FOR FIRST EARLY CROP.

	Per pint L. G.	Per quart L. G.	Per pint L. G.	Per quart L. G.
* CALDWELL'S "CRANFORD," undoubtedly the finest podded Pea in this section; quite first early, with long pods, well filled with 8 or 10 large peas of fine flavour; heavy cropper; 3 ft.	2	4	4	0
* BEDFORD CHAMPION , an extra early wrinkled variety; pods long and well filled with peas of fine flavour; 3 ft.	2	4	4	0
BRITISH LION , a particularly strong growing variety; very early, pods in pairs; 3½ ft.	2	4	4	0
* EARLY GIANT , one of the earliest; well-filled pods, of good flavour; 3½ ft.	2	4	4	0
* GIANT STRIDE , handsome dark green pods, as large as those of QUIRK CORNENT ; strong grower, abundant cropper; 2½ ft.	2	0	4	0
* GRADUS IMPROVED , a very fine large-podded early variety, with pods containing on an average 8 large peas; 3½ ft.	2	4	4	0
* KELVEDON TRIUMPH , a variety of outstanding merit, coming into bearing about a week after PROGRESS ; pods of exceptional length and superb in form and texture; 1½ ft.	—	—	—	—
* KELVEDON WONDER , a fine variety, pods long and well-filled; very early; 1½ ft. ...	2	4	4	0
* LANCASHIRE LAD , strong and vigorous grower, long dark green pods; 2 ft.	2	4	4	0
* LAXTONIAN , a very early wrinkled marrowfat, of strong starchy growth; large, well-filled dark green pods; 1½ ft.	2	4	4	0
* LAXTON'S PROGRESS , a grand dwarf, earlier than LAXTONIAN , and a heavy cropper, averaging 9 to 10 peas to the pod; 1½ to 2 ft.	2	4	4	0
LAXTON'S SUPERB , a fine Pea for early sowing; very robust grower and heavy cropper; 2½ ft.	2	4	4	0
* LITTLE MARVEL , a first early dark green wrinkled marrow; a great cropper; 1½ ft.	2	4	4	0
* PETER PAN , a robust grower, producing a very heavy crop of dark green well-filled pods; peas of excellent flavour; 1½ ft.	2	4	4	0
* PIONEER , robust habit, carries a heavy crop of long, well-filled pods; rich flavour; 2 ft.	2	4	4	0
PRIMO , very early, of vigorous growth; large, well-filled pods, containing peas of fine flavour; 3 ft.	2	0	4	0
THE PILOT , a first early, producing deep green pods of the GRADUS type, but is of a harder constitution; 3 ft.	2	0	4	0
* THOMAS LAXTON , a large-podded Pea; rich dark green, true wrinkled marrow; No Plum Ultra-shaped pods; 3 ft.	2	4	4	0
* TIMPERLEY WONDER, IMPROVED , a very fine first early; heavy cropper; long well-filled pods; 1½ ft.	2	4	4	0

PEAS FOR SECOND EARLY CROP.

* CALDWELL'S KING CANUTE , a magnificent dwarf marrowfat, the blunt-ended pods are borne in pairs, and are tightly filled with peas of excellent flavour; very heavy cropper and strongly recommended; 2½ ft.	2	4	4	0
* ADMIRAL BEATTY , a dwarfier and earlier DUKE OF ALBANY , fully wrinkled and marrowfat, pods long and pointed; very prolific; 3½ ft.	2	4	4	0
* Chancellor , a variety of sterling merit, magnificent cropper, large dark green pods, mostly in pairs, 10-12 peas in a pod, of excellent flavour; 3 ft.	2	4	4	0
* DUCHESS , in the way of DUKE OF ALBANY , but earlier and a heavier cropper; 5 ft. ...	2	4	4	0
* Duke of Albany , produces well-filled pods in pairs; excellent flavour and quality; 5 ft.	2	4	4	0
* DUPLEX , a distinct early maincrop; the pods, which are produced mainly in pairs, are of first size and well filled with peas of good flavour. It comes to maturity rather earlier than STRATAGEM ; 2½ ft.	2	4	4	0
* KELVEDON PERFECTION , an outstanding variety, perhaps the best of the KELVEDON series; large-podded, of superior form and texture, well-filled and practically free from pithiness; 2 ft.	—	—	—	—

PEAS FOR SECOND EARLY CROP—continued.

	Per pint		Per quart			Per pint		Per quart	
	s.	d.	s.	d.		s.	d.	s.	d.
* Kelvedon Spitfire , a much improved Daisy type pods rich dark green and appreciably larger than DAISSY; 2 ft.	—	—	—	—	* PHENOMENON , a dwarf growing form of V.C., with very large, slightly curved pods, well filled with 9 to 12 peas; 2 ft.	2	6	4	0
* Onward , a heavy cropper, having long straight pods, containing peas of fine flavour; 2½ ft.	2	4	4	0	* RENTFAYER , a heavy cropping wrinkled variety, with long straight pods; fine flavour; 2½ ft.	2	4	4	0
* Pearless Marrowfat , one of the finest mid-season green wrinkled varieties; the pods are borne in profusion and contain 9 to 11 large peas of excellent flavour; 3 ft.	2	4	4	0	* SENATOR , remarkable cropper, good flavour, and vigorous; 2½ ft.	2	4	4	0

PEAS FOR MAIN CROP.

* CALDWELL'S INVINCIBLE , a very handsome exhibition variety; large, deep green, straight pods; very prolific, of excellent quality; 5 ft.	2	4	4	0
* ALDERMAN , a splendid Pea for exhibition; of strong branching habit; 5 ft.	2	4	4	0
* BRITISH EMPIRE , immense and handsome, dark green, very long pods with pointed ends; splendid cropper; fine exhibition sort; 3½ ft.	2	6	4	0
* GLADSTONE , excellent cropper, pods very long, containing 10 to 11 peas of large size; fine flavour; ¾ ft.	2	6	4	0
* MIRACLE , a drought-resistant early maincrop variety; pods long, very deep green, well-filled with peas of rich colour and exquisite flavour, and a remarkably heavy cropper; 4 ft.	2	4	4	0
SUGAR PEA , edible podded, the pod and peas being cooked as picked from the plant; 6 to 7 ft.	2	6	4	0
* UNION JACK , enormous cropper, and of supreme quality; 2½ ft.	2	4	4	0

NOTE.—Half-pints can be supplied of any of the above varieties, at the pint rate plus 1d.

ASPARAGUS.

Sow early in spring in drills 2 inches deep, and rows a foot apart. In the following spring the plants will be ready to remove to permanent bed.

Battersa, or Giant	per lb., 14/-;	per oz., 1/-
Conover's Colossal , very large vigorous growing variety	per lb., 14/-;	per oz., 1/-

[For Roots, see page 12].

BROAD BEANS.

Sow in rows 2 feet apart, and 2 inches deep, at the rate of 1 pint per row of 40 feet. The main crop should be sown in February to the end of April. For an early crop sow EARLY LONG-POD in November or December.

	Per pint		Per quart	
	s.	d.	s.	d.
CALDWELL'S PRIZEWINNER , for exhibition purposes this Bean has no equal; the pods are very long and well-filled. Our stock has been carefully grown and selected, and we can offer it with every confidence	1	10	3	6
AQUADULCE , extra long pods, 13 to 15 inches; suitable for exhibition	1	10	3	6
Beck's Green Gem , early, prolific; height, 12 to 15 inches	1	10	3	6
BUNYARD'S EXHIBITION LONG-POD , handsome pods; a very fine and productive variety	1	10	3	6
Green Long-pod , prized for its rich green colour	1	10	3	6
Hartington Windsor , very heavy cropper	1	10	3	6
JOHNSON'S WONDERFUL , a productive variety, for exhibition	1	10	3	6
Long-pod Early , very early and productive	1	8	3	3
MASTERPIECE GREEN LONG-POD , a fine variety for exhibition; heavy cropper	1	10	3	6
WINDSOR GREEN, IMPROVED , a fine cropping variety, prized for its deep green colour	1	10	3	6

ALL SEEDS CARRIAGE PAID.

KIDNEY or DWARF FRENCH BEANS.

These are very tender and will not bear frost. Sow about the end of April if season is favourable, and at intervals for succession, in double rows, 2 feet apart, 2 inches deep, and 6 inches from bean to bean.

	Per pint. s. d.	Per quart. s. d.
CALDWELL'S SELECTED CANADIAN WONDER , This is the true large-podded variety; exceedingly prolific, and very delicate in flavour; the best for general crop and exhibition; recommended	2 8	5 0
Brown Dutch (Haricot) , The pods are not eaten but the Beans are allowed to ripen in the pods, and when sufficiently dry, are shelled and stored for later use. Should be soaked for 12 hours before cooking. Excellent flavour	2 8	5 0
Golden Wax Pod or Butter Bean , pods pale waxy colour, almost transparent, fleshy and tender	2 4	4 6
MASTERPIECE , a stringless variety of strong constitution, having long straight pods of excellent quality	2 4	4 6
THE PRINCE , extremely long-podded and, when young, practically stringless; heavy cropper and early	2 8	5 0
THE WONDER , a long-podded early, producing in great profusion; very fine	2 8	5 0

CLIMBING FRENCH BEANS.

Tender and True (Verrill's Climbing), combines the best features of the two types—Dwarf French and Scarlet Runner. Per pint—s. d.
2 8

RUNNER BEANS.

Sow in drills in rich loamy soil (not freshly manured) from May to July, 3 to 4 feet apart, placing the seeds 2 inches deep and 4 inches apart. When the young plants are well above the ground, use stakes from 6 to 8 feet high for their support. Pinch off the tops when in full bloom.

	Per pint—s. d.		Per pint—s. d.
CALDWELL'S TRIUMPH , a very handsome Bean; it is an indispensable exhibition variety, having secured many awards, and for tenderness and quality cannot be surpassed; very heavy cropper	3 8	Princops , earliest and dwarfest Scarlet Runner; large clusters of medium, long straight pods	2 4
BEST OF ALL , pods very fleshy, of finest flavour, often 11 to 15 inches in length; fine for exhibition	3 4	Prizewinner , handsome pods and very prolific	3 8
CHAMPION SCARLET , excellent; most prolific	2 4	SCARLET EMPEROR , a very fine, long, smooth-podded Scarlet Runner; invaluable for exhibition	3 6
Neal's No Plus Ultra , a fine variety, producing an enormous quantity of handsome pods	3 6	STREAMLINE , very long straight pods; an improved SCARLET EMPEROR	3 8

NOTE.—Half-pints can be supplied of any of the above varieties at the pint rate plus 1d.

BEEF.

Sow from the beginning of May in drills $\frac{1}{2}$ -inch deep and 18 inches apart, at the rate of one ounce per row of 80 feet. When the plants have attained three or four leaves, thin out till they stand 8 inches apart.

	Per pkt. s. d.	Per oz. s. d.
CALDWELL'S SELECTED BLOOD-RED GLOBE , the finest of the Globe Beets, with large well-formed roots of a very rich colour; flavour excellent	0 6	1 4
CALDWELL'S FINE DARK RED , one of the best; splendid flavour, very fine colour and good keeper; a fine exhibition long variety	0 6	1 2
BELL'S DEEP BLOOD-RED (Non-bleeding) , is much appreciated, owing to its unique quality of not bleeding when cut; a fine exhibition variety	0 6	1 4
CRIMSON GLOBE , Selected, handsome roots of good colour and excellent quality	0 6	1 4
DELL'S SUPERB CRIMSON , excellent; fine dark foliage	0 6	1 2
DETROIT SELECT GLOBE , a fine globe variety, with deep red flesh and quite free from rings, the texture being fine grained and the flesh crisp and sweet; well recommended	0 6	1 7
EGYPTIAN TURNIP-ROOTED , in form like the EARLY DUTCH TURNIP; leaves green and leaf-stalk crimson; very tender	0 6	1 2
Intermediate , a stump-rooted variety, flesh deep red, of excellent flavour; early, and suitable for shallow soils	0 6	1 4
Perpetual Spinach, or Green-leaved , an excellent substitute for Spinach	0 4	0 10
Silver, or Sea Kale (Swiss Chard) , edible-leaved variety; the mid-rib of leaf, if dressed like Sea Kale, is excellent	0 4	0 10
Sugar Beet , now very much grown in this country	0 4	0 10

CALDWELL'S SPECIAL VEGETABLE MANURE. See page 15.

BORECOLE or KALE.

The Kales are more hardy than Cabbage, and are improved by a touch of frost. Sow from April to May. Set out the plants in July in good rich well-manured ground, and cultivate the same as Cabbage.

	Per pkt. s. d.	Per sq. s. d.		Per pkt. s. d.	Per sq. s. d.
A1 CURLED , an exceptionally fine type of Borecole, densely curled leaves	0 6	1 4	DWARF GREEN CURLED , best for general use	0 4	1 0
Asparagus or Buda Kale , excellent for spring use	0 6	1 2	Hearting, or Cabbaging , close compact heads	0 4	1 4
Cottager's Kale , good flavour, very hardy, useful	0 6	1 4	ORMSKIRK HEARTING , very hardy, will withstand the most severe weather; a great advance on other hearting varieties; the latest winter variety	0 4	1 4
DRUMHEAD , this resembles in shape a Drum-head Cabbage, entirely distinct from any other variety. The leaves, with their strong mid-ribs, almost equal Asparagus in flavour when cooked	0 6	1 6	Tall Green Curled , very hardy; robust	0 4	1 0
			Thousand-headed , useful for spring cutting	0 4	1 0

BROCCOLI.

Sow at the rate of one ounce to 5 square yards, from March to May, at intervals of a fortnight. When 2 or 3 inches high, prick out 6 inches apart, and four or five weeks afterwards plant into highly manured ground which has not been similarly cropped for two seasons, placing the plants 2 feet apart.

For Cutting in September, October, and November.

	Per pkt. s. d.	Per sq. s. d.
GREEN SPROUTING (CALABRESSE) . A distinct variety, very popular on the Continent, and deserving of more attention in this Country. Ready for use in September, the deep green flower heads, which should be cut before they show signs of opening, have a delicious flavour	1 0	—
VEITCH'S SELF-PROTECTING , the heads are beautifully white, large, firm, compact, and well protected	1 0	—
WALCHEREN , one of the best white varieties for succession	1 6	—

For Cutting in following January and February.

	Per pkt. s. d.	Per sq. s. d.
BACKHOUSE'S WINTER WHITE , large, compact	1 0	3 9
PENZANCE EARLY WHITE , firm heads of good quality; reliable	1 0	3 9
Purple Sprouting, Early , a useful winter variety; hardy; prolific	0 4	0 10
White Sprouting, Early Improved , very hardy, useful variety	0 0	2 2

For Cutting in following March and April.

CALDWELL'S CRANFORD WHITE. We recommend it most strongly as the best in this section. The heads are firm and close, beautifully white, and well protected by foliage, whilst the quality is excellent. Per packet, 1/6.

	Per pkt. s. d.	Per sq. s. d.		Per pkt. s. d.	Per sq. s. d.
APRIL QUEEN , one of the best	1 0	3 9	Purple Sprouting, Late , very hardy, productive	0 6	1 2
Knight's Protecting , first-class variety	1 0	3 9	White Sprouting, Late , delicious sprout-like heads	0 9	2 2
Leamington , white heads, self-protecting	1 0	3 9			

For Cutting in following May and June.

	Per pkt. s. d.	Per sq. s. d.
Cattell's Eclipse , hardy sort; large compact heads	1 0	3 9
Late Queen , large close white heads, well protected	1 0	3 9
METHVEN'S JUNE , produces fine pure white heads till nearly the end of June; very hardy	1 0	3 9
VEITCH'S MODEL , hardy, self-protecting; very late	1 0	3 9

BRUSSELS SPROUTS.

Sow in March and April at the rate of one ounce to 5 square yards, and transplant in the beginning of June, placing the plants 3 1/2 feet apart.

	Per pkt. s. d.	Per sq. s. d.
CALDWELL'S LEVIATHAN , a true and distinct variety, growing about 2 to 3 feet high, densely covered from top to bottom with sprouts as large as a good-sized hen's egg; hardy, and of splendid flavour; recommended as the best for general use and exhibition purposes	1 0	—
Aigburth , a splendid variety; very productive	0 6	1 3
ROUS LENCH , vigorous, prolific; producing exceptionally hard solid dark green sprouts	0 6	1 3
SOLIDITY , the sprouts are quite distinct, hard and firm, and of excellent quality	0 6	1 3
The Darlington , very fine dwarf-growing variety; early	0 6	1 3
THE WROXTON , large and prolific variety	0 6	1 3
TIMPERLEY CHAMPION , large solid hearts, of fine quality	0 6	1 3

CABBAGE.

For cutting during May and June sow from middle of July to end of August in any ordinary garden soil, and transplant when ready into rows 18 inches apart, placing the plants 12 inches apart in the rows. For a later crop sow in February, March or April, and transplant on to ground cleared of early crops, such as early potatoes.

Per packet, 6d., except those priced.

	Per sown—s. d.	Per sown—s. d.
CALDWELL'S IDEAL , this is without doubt one of the most reliable varieties for spring crop, coming in early, of good regular size, short in leg, and with little superfluous leaf; recommended	1 10	
All the Year Round , medium size, deep green, of compact habit, somewhat conical in shape; may be sown successionaly for crops throughout the spring, summer and autumn	1 10	
April , a variety of perfect form; one of the best for autumn sowing	2 0	
Christmas Drumhead , a small solid-headed variety; compact habit; distinct	1 3	
Drumhead, or Scotch , a late variety with immense heads, per pkt., 4d.	1 1	
EARLY DURHAM , very early, nicely formed, medium size, pointed hearts, excellent for autumn sowing ..	1 10	
ELLAM'S EARLY , compact; very early	1 8	
EXPRESS , extra early, for spring sowing, one of the quickest growing Cabbages in existence, per pkt., 6d.	2 0	
FLOWER OF SPRING , one of the earliest; medium size, firm and compact	1 8	
GOLDEN ACRE , very early ball-headed type; solid round heads of excellent quality carried on short stems, per pkt., 6d.	2 0	
GREYHOUND , the earliest bearing of all Spring-sown Cabbages; handsome pointed hearts with a minimum of outer leaves; superior quality ..per pkt., 6d.	2 0	
Harbinger , very early, and of fine quality	1 10	
HURST'S FIRST AND BEST , good for autumn sowing ..	1 8	
January King , firm heart, excellent quality; sown in May-June, will stand until December-January	1 8	
Leeds Market , early and of fine quality; well adapted for market garden	1 8	
Manchester Market , a very select stock of this fine variety; one of the best for general use	1 10	
MEIN'S No. 1 , early; handsome variety	1 3	
PRIMO , a very early dwarf compact variety, with close, firm heads and practically no waste leaves; sown in March, can be cut in July and August ..pkt., 6d.	2 0	
Red Dutch , for pickling; large solid heads	1 10	
STOCKLEY'S GIANT RED , the largest and best pickling ..	1 10	
UTILITY , deep green, solid hearts; fine for autumn and winter use	2 0	
WIRNINGSTADT , a remarkably fine late variety, with large conical heads	1 10	

COLEWORT, ROSETTE, small, dark green, with broad rose-coloured tint in leaf, compact heads, very tender; valuable for early winter use

SAVOY CABBAGE.

Sowings may be made in February, March, and April, and planted out when ready 18 inches apart.

	Per sown—s. d.
CALDWELL'S GEM . This splendid variety is the finest late Savoy in existence; the heads are very solid, of a good size, and finest quality; is extremely hardy, standing through the severest winter, and will be fit for use when most other sorts are over	1 4
DRUMHEAD , largest variety grown	1 1
Dwarf Green Curled , best for general use	1 4
Little Pixie, or Tum Thumb , very small	1 4
Ormskirk Late Green , very select	1 4

CARROT.

Sow at the rate of one ounce per row of 100 feet, half an inch deep, and in rows about 12 inches apart, and as soon as the plants show, thin out to 4 or 5 inches. Sow **EARLY HORN** at the end of March, a second or main crop at the end of April, and again about the beginning of June, and a last sowing of **EARLY HORN** in August.

	Per sown—s. d.
CALDWELL'S EARLY WONDER , a fine introduction, of extra good quality; cylindrical and stump-rooted in shape. It is coreless, matures very quickly, and has tender, almost transparent flesh of rich colour; ideal for garden or frame work	2 0
ALTRINCHAM SELECTED , the best for general crop	2 4
AMSTERDAM FORCING , half-hing variety for frames; produces a much heavier crop than FRENCH HORN in the same time	2 0
EARLY FRENCH SCARLET HORN , very early, and invaluable for forcing	2 0
EARLY GEM , early variety; fine quality; stump-rooted	2 4
Early Market Red Corad , a large percentage are practically without core, being the same colour all through; stump-rooted, per pkt., 1/- ..	2 4
Early Nantes Horn , an excellent variety	2 4
Early Scarlet Horn , for early summer use	2 4
GUERANDE , stump-rooted	2 4
JAMES' INTERMEDIATE SCARLET (Selected) , a well-known variety, well adapted for shallow soils, per pkt., 6d., and 1/- ..	2 4
Long Red Surrey , fine quality	2 4
ST. VALERY , exhibition variety	2 4

CAULIFLOWER.

Sow under glass in February or March for transplanting in April for a supply in July and August; again early in April for September use; and for spring use sow in August and transplant in March or April in rows 2 feet by 2 feet, in highly cultivated soil.

	Per packet—s. d.
CALDWELL'S PERFECTION , produces very large snow-white heads, foliage compact and erect, so that planting may be done quite closely. Suitable for growing in frames or for early spring cutting	1 0
ALL THE YEAR ROUND , a very hardy quick-growing variety, with large pure white heads	1 0
Early Dwarf Erfurt, or Mammoth , compact pure white heads; keeps firm a long time	1 0
EARLY LONDON , large; fine proved stock; good for general crop	1 0
EARLY SNOWBALL , very early, ready to cut four months from time of sowing; selected stock	1 0
ECLIPSE, IMPROVED , a valuable self-protecting variety; large heads of cool-like whiteness	1/- and 1 0
IMPROVED AUTUMN GIANT , a valuable late variety; beautiful white heads	1 0
MAJESTIC , an excellent autumn variety producing very large, solid white heads	1 0
White King , very early, suitable for forcing or open ground and for Spring or Autumn sowing	1 0

CELERY.

Celery plants require the help of a hot-bed to raise them in good time to grow fine roots. Sow in shallow pans or boxes in February and March. Celery should be planted in trenches 12 to 18 inches deep, at the bottom of which, in well-stirred soil, a heavy dressing of rich dung should be dug in. Keep the plants well watered and protected from hot sunshine until well established. Give liquid manure freely when the plants begin to grow, its effect will soon be visible. Earth up gradually as the plants increase in height.

Per packet, 6d. except where priced.

CALDWELL'S SOLID WHITE. We claim this to be the finest white variety. The heads attain a large size, and are of perfect quality; clear pure white, very firm and solid. Per pkt., 1/-

CALDWELL'S INCOMPARABLE. The best red variety, produces heavy solid sticks of large size and delightfully crisp, nutty flavour; excellent for exhibition. Per pkt., 1/-

CALDWELL'S PRIZE PINK. The best pink Celery, of medium growth, solid and crisp; a good exhibition variety, and of excellent flavour. Per pkt., 1/-

Clayworth Prize Pink, quick-growing variety; solid.
Cole's Crystal White, a superior dwarf growing variety; fine flavour; solid and crisp.

Cole's Defiance, a very hardy and dwarf variety; red.

Golden Self-Blanching. A distinct variety with short, thick, broad stalks; fine, crisp, nutty flavour. Can be grown on the level and does not require earthing up.

Major Clarke's Red, solid hearts, of excellent flavour.

STANDARD BEARER, a splendid red variety; compact.

WRIGHT'S GIANT WHITE, one of the best in cultivation.

Wright's Grove White, very crisp and solid; nutty flavour.

WRIGHT'S GROVE RED, solid and crisp; fine nutty flavour.

Celery Seed, for flavouring soup. Per oz., 1/-

CELERIAC.

A most delicious vegetable which is very popular in some quarters. It may be used as a salad, or the roots cooled and served in the same manner as Beet. Celeriac does best in a light soil, which must be fairly rich. Per packet, 6d. and 1/-

CHERVIL.

Sow in March for summer crop, and in July for winter use, upon light stony soil, and thin out to 6 inches apart. It is very pretty for garnishing, and excellent for salads and soups.

Curled per pkt., 6d.

CHICORY.

Useful for winter salads. Sow in May or June; store the roots in November. When forced in a dark position will blanch in the same way as Sea Kale.

Without, large-leaved; for winter salads when blanched. per packet, 6d. and 1/-

CORN SALAD

(Lamb's Lettuce).

Sow in drills 9 inches apart, any time from February to October, and transplant to 6 inches apart.

English per pkt., 6d.

CALDWELL'S SPECIAL VEGETABLE MANURE. See page 15.

CUCUMBER.

Sow seed in pans placed in strong bottom heat towards the end of January, and if a succession is wanted, repeat the sowings in February, March, and April. As soon as the secondary or rough leaves are developed, transplant singly into 3-inch pots, using a compost of light turfy loam not broken too small, with about a third of the whole quantity of well-rotted manure added. This soil should be warmed before being used, and the best way to do this is to place it in a warm greenhouse for 48 hours. A shift into 4 or 5-inch pots at the proper time will be desirable, after which the plants may be transferred to the fruiting beds. A temperature of 70 to 75 degrees, with a minimum of 60 degrees, should be maintained, and the walls and passages kept moist. When the weather is warm give plenty of air, and syringe morning and evening. Cucumbers are generally grown in span-roofed houses, which are specially suitable for their culture; but where stable litter is plentiful, a good supply may be had by growing them on hotbeds in pits or frames.

	Per packet—s. d.
CALDWELL'S BOUNTIFUL , a very superior and reliable variety for either summer or winter cultivation; the fruits are of fine shape, large and uniform in size, deep green in colour, and of exceptionally fine quality; it is an enormous cropper, suitable for exhibition or culinary use	1 6
CALDWELL'S CANUTE , a most handsome variety, suitable for cool house or with heat, but forcing is neither necessary or desirable. It is outstanding for flavour, shape and quality, also for heavy and continuous bearing; recommended	1 6
All the Year Round , black spined, free bearer, handsome fruit	1 6
DISEASE RESISTER (BURCUM'S), very free and suitable for either market or private use	1 6
Every Day , dark skinned, very handsome, and of splendid flavour	1 6
KNUTSFORD WONDER , a distinct variety, bearing long straight fruits of deep green colour; very little neck; most prolific, and excellent flavour	1 6
LOCKIE'S PERFECTION , a prolific black-spined variety of uniform thickness	1 6
ROCHFORD'S MARKET , the fruit is smooth, slightly spined, of a beautiful fresh green colour; a wonderful cropper	1 6
TELEGRAPH, IMPROVED , a superior well-known prolific variety	1 6
Tender and True , 24 to 30 inches long; dark green colour; excellent quality	1 6

And all other advertised varieties.

OUTDOOR CUCUMBERS.

Sow in May under a hand glass on a trench 3 feet wide, previously filled up to the depth of 1½ feet with well-decayed manure and leaves.

Short Prickly , for pickling	per pkt., 6d.	Long Prickly , hardy variety	per pkt., 6d.
Stockwood Ridge , fruit 12 to 15 inches long, hardy and prolific			per pkt., 6d.

CRESS.

Cress should be given rather more time than Mustard. Where a constant supply is required during the winter, a little should be sown twice a week in boxes or pans placed in gentle heat—in the summer sow once a fortnight out-of-doors.

	Per ounce—s. d.		Per ounce—s. d.
EXTRA FINE CURLED , useful for salad and garnishing	per quart, 4/9; per pint, 2/6 0 4	Plain	per quart, 4/9; per pint, 2/6 0 4

EGG PLANT (Aubergine).

Sow in March in gentle heat. Pot off as soon as large enough to handle, and grow on in heat.

Scarlet	per pkt., 6d.
----------------------	---------------

ENDIVE.

Sow in June, July and August, in drills about a foot apart. Sow thinly and cover lightly. Thin out to 12 inches. It must be blanched before using by being tied up or covered with large pots, boxes, or anything else suitable. Lift remaining plants in October, and put into a frame, covering up with leaves to blanch. This capital salad may be had for a long time.

	Per packet, 6d.		Per ounce—s. d.
BATAVIAN WHITE , excellent variety, early blanched	1 6	Green Curled , large, with fine solid heart	1 6
DIGSWELL PRIZE , fine green curled	1 6	White Curled , fine quality	1 6

ALL SEEDS CARRIAGE PAID.

GOURD OR PUMPKIN.

Culture the same as for Vegetable Marrow. Some of the ornamental varieties can be trained over arches, &c.

Hundredweight or Mammoth yellow, the largest in cultivation, often attaining an incredible weight.....	Per packet—s. d.
Ornamental Mixed many curious and pretty kinds.....	0 6

KOHL RABI

OF TURNIP-ROOTED CABBAGE.

This delicious vegetable somewhat resembles a Turnip, and should be more widely known on account of its most agreeable flavour. Sow the seed thinly in rows any time from March to June, and when the plants are about 2 inches high transplant into rows 12 to 18 inches apart, with about 8 inches between the plants.

Early Green , greenish white flesh; delicate flavour.....	Per packet—s. d.
	0 6

LEEK.

Sow at the rate of one ounce to 4 square yards, from February to April. When 5 or 6 inches high, transplant into deep, rich soil to stand 5 or 8 inches apart, plant them deeply, close to the leaves, that the neck, by being covered, may become blanched. Settle the soil round them by a good watering, and give frequent doses of liquid manure.

CALDWELL'S PRIZETAKER . This variety we consider is a great advance on all others, both for exhibition or table use; the stems are remarkably solid and of the clearest white, whilst the flavour is exceedingly delicate; recommended.....	per pkt., 1/6 —
Musselburgh , large variety; hardy.....	per pkt., 6d. and 1/- 6 0
Renton's Monarch , a good useful variety, mild flavour.....	per pkt., 1/- —
THE LYON , an exhibition variety, growing to a great length; selected stock.....	per pkt., 1/- 6 0
Walton Mammoth , long, thick, very solid stems; excellent quality.....	per pkt., 1/6 —

LETTUCE.

Can be had in succession all the year round by sowing every three weeks from spring to end of July. Another sowing may be made in August to stand the winter. Sow at the rate of one ounce to 8 square yards, in shallow drills a foot apart, and thin out to 8 inches.

CABBAGE VARIETIES.

Per packet, 6d., except where priced.

Per ounce—s. d.	Per ounce—s. d.
CALDWELL'S KING OF HEARTS . A variety of outstanding merit, with large, yet compact, crisp solid hearts; bright medium colour, and very long standing.....	1 7
ALL THE YEAR ROUND , large, solid, white and crisp; crisp; very hardy, and not liable to run to seed.....	1 7
ARCTIC KING , one of the most reliable varieties for autumn sowing; very hardy and good quality.....	1 9
BOROUGH WONDER , rather pale green in colour, suitable for spring and autumn sowing; forms a solid heart, stands well.....	1 7
GRESHUNT EARLY GIANT , an excellent variety for early forcing, selected to heart during the short daylight days, in February and early March, pkt., 1/-.....	4 0
FAVOURITE , a quick hearting superior type, with curled leaves; large and solid.....	1 7
FRENCH FRAME FORCING (BLACKPOOL) , a fine variety for very early work in frames, delicate light green in colour, quick and tender..... per pkt., 1/-.....	4 0
GOLDEN BALL , very compact; excellent for forcing in frames and greenhouses..... per pkt., 6d.	2 0
Hammersmith Hardy Green , very hardy; the best for winter use.....	1 7
Ipsberg , pale green, edges slightly fringed, curled, and tinged with brown; big solid hearts; very distinct.....	1 7
LOOS TENNIS BALL , a splendid quick growing Lettuce, with good heart; recommended for forcing, per pkt., 1/-.....	4 0
MAY KING , a fine Cabbage variety, growing to a large size; excellent quality.....	1 9
TOM THUMB , small, compact-growing variety; solid hearts; splendid forcer.....	1 7
TROCADERO IMPROVED , Summer or Winter variety; produces first-class compact heads with a minimum of outside leaves, free from any brown tinge; very popular.....	1 7
Winter Density , between a Cos and a Cabbage; a distinct variety; quick hearting and of exceptional flavour, per pkt., 9d.	2 2
WONDERFUL , immense size and first-rate quality; stands longer than any other variety without running to seed.....	1 0

COS VARIETIES.

Per packet, 4d., except where priced.

BALLOON or MAMMOTH , grows to an enormous size.....	1 4	LONDON WHITE , crisp, and folds in well; largely grown for Covent Garden Market; very fine variety.....	1 4
Hicks' Hardy White , splendid variety, large, crisp, pkt., 6d.	1 7	PARIS WHITE , large and compact.....	1 4
LOBJOIT'S GREEN , splendid self-folding variety; very crisp, medium in height; compact habit, pkt., 6d.	1 7		

MAIZE (Indian Sugar Corn).

A New English Vegetable. Easily cultivated. Sow in the open ground beginning of May, in rows 2½ feet apart, and eventually thin plants to 1½ feet apart; it is now being largely grown in this country.

Golden Bantam, the earliest of all Sugar Corn, very fine; the most suitable for this climate per pkt., 6d.

MELON.

This delicious fruit requires abundance of heat and sunshine to ripen thoroughly. Sow seed in January, February and March, in seed pans placed in strong bottom heat, and as soon as the first leaf, after the seed leaves, appears, shift them into 3-inch pots. When a good mass of roots is formed they should be planted in the fruiting beds. A compost of good man and well-rotted cow manure, half of each, will suit. Press the soil very firmly about the roots.

	Per packet—s. d.
BEST OF ALL , colour deep orange, flesh white; free setter	1 0
Blenheim Orange , handsome scarlet-fleshed variety	1 0
Delicious Cantaloupe , very prolific, fruit of large size, when ripe of beautiful golden colour, with bright orange-scarlet flesh	1 0
HERO OF LOCKINGE , white fleshed; very productive	1 0
MUNRO'S LITTLE HEATH , hardy and prolific variety, of exceptional flavour; scarlet flesh	1 0
VICTORIA , scarlet-fleshed variety, juicy and excellent flavour	1 0

MUSTARD.

For early salads sow thickly on a gentle hotbed in February, and at intervals during spring on very fine soil, in rows 6 inches apart.

Fine White, for salads, &c. per quart, 4/9; per pint, 2/6; ounce, 6d.

ONION.

To grow Onions successfully the soil should be well manured and roughly dug the previous autumn. As early in March as the ground is workable, level with a rake, and roll or tread firmly. Sow at the rate of two ounces per 100 feet, in drills about a quarter of an inch deep and 9 inches apart, cover with fine soil, and press down with the back of a spade. Keep clear of all weeds by hoeing, and give an occasional watering of liquid manure. When the plants are two inches high, thin out to three inches apart. Pull every other Onion for salading, and ultimately thin out to six inches apart. For exhibition, sow in boxes in greenhouse, early in January. Transplant when ready into other boxes, gradually hardening off, and plant out in the open during April.

	Per pkt. s. d.	Per doz. s. d.
CALDWELL'S EXHIBITION , continues to hold its prominent position as the best variety in commerce; equally valuable for exhibition or culinary purposes. It is unrivalled for perfection of form, combined with size and weight; in competition with all others, CALDWELL'S EXHIBITION has won a series of Prizes without parallel	1 0	—
ALSIA CRAIG, IMPROVED , skin pale straw colour, flesh beautifully white and mild; valuable for exhibition	1 0	4 6
ALSIA CRAIG (Ordinary Stock)	1 0	3 6
AUTUMN TRIUMPH , flattened globe-shaped bulbs attaining an immense size; good for exhibition. Recommended for Autumn sowing, and as one of the finest keeping Onions in cultivation	1 0	4 0
BANBURY CROSS , good keeper, and grows to a large size; fine exhibition variety	1 0	4 0
BEDFORDSHIRE CHAMPION, IMPROVED , fine solid heavy variety, and excellent keeper; selected stock	1 0	3 8
Brown Spanish good keeper	1 0	3 8
CRANSTON'S EXCELSIOR , globe-shaped, straw-coloured bulb; a fine exhibition variety, and long keeper	1 0	3 6
GOLDEN BALL , a distinct globe Onion, growing to a large size; a beautiful globe shape	1 0	4 0
JAMES' KEEPING , well-known kind, strong flavour; good keeper	6d. and	1 0 3 8
PRIZETAKER , a fine large globe, long keeping and heavy cropper; selected stock	1 0	3 6
Red Wethersfield , a flat Onion of good keeping qualities	1 0	3 0
Rousham Park Hero , grows to an immense size, of handsome shape, and very mild in flavour	1 0	4 0
Silver Skinned Pickling , a small early variety for pickling	1 0	3 8
TRIPOLI GOLDEN GLOBE , a heavy cropper; large, solid and a good keeper	1 0	3 8
Tripoli, Large Flat Red Italian , very largely grown, mild and agreeable flavour, good keeper	1 0	3 8
Tripoli, Large White Italian , large size and of mild flavour; for Autumn sowing	1 0	4 0
UP-TO-DATE , a perfectly formed globe Onion; very solid; keeps long	1 0	3 8
White Lisbon , the well-known silver-skin variety; very hardy; used mostly for pulling green in Spring, 6d. and	1 0	3 0
White Spanish, or Reading , pale straw colour with mild flavour	1 0	3 8
Mixed Onions for Spring Sowing	6d. and	1 0 3 6

ALL SEEDS CARRIAGE PAID.

PARSLEY.

Sow in February or March half-an-inch deep, at the rate of one ounce per row of 40 feet. When the plants are two inches high, thin out to 8 or 10 inches apart, being careful to leave only the best curled plants.

	Per ounce—s. d.
CALDWELL'S SPLENDID CURLED , very select stock; intensely curled; the most effective variety for garnishing	per pkt., 4d. 0 0
Covent Garden Garnishing , a well-tried variety	per pkt., 4d. 0 0
Moss Curled , selected	per pkt., 4d. 0 0
Myott's Garnishing , hardy, fine curled	per pkt., 4d. 0 0

PARSNIP.

Sow in February and March, in drills 18 inches apart, and cover with about half-an-inch of fine soil. When the young plants are about 2 to 3 inches high, thin out to 9 inches. Sow at the rate of one ounce per drill of 100 feet.

Per packet, 4d., except where priced.

	Per ounce—s. d.
CALDWELL'S IMPROVED MARROW . This variety is a great improvement, ideal for either exhibition or general use; it has a very clean, handsome root, with deep crown	per pkt., 6d. 0 0
LISBONNAIS , fine form for exhibition, splendid flavour	0 0
TENDER AND TRUE , well-formed roots of fine quality	0 0
THE STUDENT , very fine; superior flavour	0 0

RADISH.

For an early crop in the open ground select a sandy soil and a warm southern exposure, sheltered by some covering, if possible. One ounce will sow a bed of 4 square yards. The winter varieties should be sown during July and August, and lifted on the approach of frost, and buried in earth in a cool cellar.

Per packet, 4d.

	Per pint.	Per oz.
	s. d.	s. d.

TURNIP, RED AND WHITE , mixed or separate	0 0	0 0
Wood's Early Frame , the best long forcing variety; white flesh; tender	0 0	0 0

RHUBARB.

Sow the seeds thickly on a moderate hotbed at the end of summer; the seedlings should remain there until early in spring, then be planted out in rows 9 inches apart, and finally transferred to their permanent quarters.

GLASKIN'S NEW PERPETUAL, bright cherry-coloured sticks; excellent quality, per packet, 6d. (For Rhubarb Roots, see page 12).

SALSIFY.

Cultivated in the same manner as Carrots and Parsnips, and may be left in the ground all winter for early spring use, or stored like Carrots.

Salsify, Mammoth Sandwich Island, twice the size of the ordinary variety.....per pkt., 1/-; per oz., 2/6

SEA KALE (Seed).

Sow early in April, and the following spring transplant into deep rich soil.

Lily White

per pkt., 1/-; per oz., 3/-
For Prices of Roots, see page 12.

SPINACH.

For an early summer crop sow the early **ROUCCO-SARNO** in February, in drills one foot apart, and thin out to two inches in the row. The **Prickly** kind is generally sown in August for winter and early spring use. Sow at the rate of two ounces per drill of 100 feet.

	Per ounce—s. d.
MONARCH LONG STANDING , round; superior strain. Giant thick fleshy dark green leaves in profusion; very long standing.	per pint, 2/9; 1/2-pint, 1/5 0 7
MONSTROUS VIROFLAY , extra large-leaved summer variety.	per pint, 2/9; 1/2-pint, 1/5 0 7
New Zealand , produces a great quantity of leaves throughout the summer.	0 7
Prickly, or Winter , long standing.	per pint, 2/9; 1/2-pint, 1/5 0 7
Round Scoded, or Summer , for spring and summer sowing.	per pint, 2/6; 1/2-pint, 1/4 0 6
Spinach Best (see under heading of BEET , page 3).	
VICTORIA IMPROVED ROUND , a very fine variety, remaining fit for use much longer than the ordinary Round.	per pint, 2/9; 1/2-pint, 1/5 0 7

TOMATO.

For early crops sow in January and again in February and March for succession. The seeds should be sown half an inch deep in pans or shallow boxes of moist sandy soil, placed in a temperature of about 60 degrees. When two or three leaves have formed, prick out into small pots. As soon as the pots are filled with roots transfer straight to borders, or into ten-inch size if they are to be fruited in pots. For outdoor culture sow early in March in a hot-bed, grow the plants on as freely as possible under glass till the end of May, when they may be planted out on a warm border, well-prepared with well-rotted manure.

	Per packet—s. d.
CALDWELL'S KING CANUTE , an excellent new red variety, and notwithstanding the large number of Tomatoes on the market, we claim to have reached nearer perfection in this variety than in any other. It is a tremendous cropper, fruits medium in size, and very uniform; of a bright rich red colour, the flesh being solid throughout. Flavour exquisite—recommended.	1/- and 1 6
CALDWELL'S FILLBASKET , a very popular variety, suitable for either indoor or outdoor purposes; it is an exceptionally heavy cropper, and the flavour is excellent; recommended especially to growers of large quantities for market.	1 0
AILSA CRAIG , a handsome heavy cropping variety, with fruit of good shape and flavour.	6d. and 1 0
ALL CLEAR (Stonor), a good heavy cropping variety bearing a typical Stonor fruit; resistant to mildew.	1 0
BIDE'S N.C.O. , a cross between RESCUET and RADIX , and is very short-jointed; the fruit is produced in large bunches, is firm and fleshy, with thin skin and very little seed.	6d. and 1 0
DWARF GEM (Stonor's), a bush type ideally suitable for outdoor culture, for the small greenhouse or growing under cloches; allowing 12 to 18 inches from plant to plant. It matures very early.	1 0
KONDINE RED , a fine variety, producing large trusses of fine shaped fruit.	6d. and 1 0
MARKET KING , a very heavy cropper; early, and produces round fruit, medium in size, and very regular both in size and shape.	6d. and 1 0
OPEN AIR WONDER (WOODWARDS'), described by the raiser to be the quickest maturing variety outside; a wonderful cropper; flavour excellent and definitely non-acid.	1 0
ORANGE SUNRISE , is the result of a cross between the best red and yellow varieties, and bears fruit of a bright orange colour; excellent flavour; suitable for indoor or outdoor culture.	1 0
POTENTATE , fruits even and of medium size, prolific.	1 0
STONOR'S M.P. This Tomato averages about six fruits to the pound, is very short-jointed, and colours evenly all over; the quality is excellent.	6d. and 1 0
VETOMOLD . We strongly recommend this recent introduction from Canada. A very heavy cropper bearing round, medium size scarlet fruit of solid texture. The plants are vigorous in growth, fairly short-jointed, carrying large trusses and having the great qualification of being resistant to leaf mould disease. The seed offered is from selected plants in our own nursery.	1 0
VICTORY , an enormous cropper, with fruit of fine shape and colour.	1 0

TURNIP.

Sow at intervals as required, from the end of March to the end of July, and when the plants are well up thin them out to about 8 inches apart. Hoe and keep clear of weeds. Turnips require a light rich soil to grow them to perfection. Sow about one ounce per pole, or 1 lb in 4 lbs. per acre.

Per packet, 3d.

YELLOW FLESHED.

	Per ounce—s. d.
All the Year Round , distinct and of good flavour; green top, pale yellow flesh; hardy.	0 8
GOLDEN BALL, DOBBIE'S SELECTED , very useful for exhibition.	0 5
Golden Ball, or Orange Jelly , excellent for autumn use.	0 5
Laing's Swede , small, and of fine quality.	0 5

WHITE FLESHED.

EARLY PURPLE-TOP MILAN , much superior to EARLY MONROE , and of excellent flavour.	0 8
EARLY SNOWBALL , a fine round white Turnip.	0 5
Early White Stone , excellent; keeps well.	0 5
MANCHESTER MARKET GREEN-TOP , white, with green top; excellent keeper; one of the best.	0 5
MODEL WHITE , finest of the mouse-tail class.	0 5

VEGETABLE MARROW.

Sow in a hotbed in April, and plant out in beds or mounds after the weather has become settled and warm, about end of May or June.

	Per packet—s. d.
Mustard , fruit small, of fine flavour	0 8
Long Green , large and prolific	3d. and 0 0
Long White , for general crop	3d. and 0 0
Long White Bush , a compact grower	0 0
Moore's Cream , oval shape, fine flavour	0 0
TABLE DAINTY , a very prolific running variety, medium size, oblong fruit, bright green, well striped; excellent quality.	0 0

TRANSPLANTED VEGETABLE PLANTS.

Plants of the following vegetables can be supplied ready to plant out in their season from February to August.

All the plants we offer below are strong and healthy and are grown from our selected strains of seeds:—

Borecole or Kale	8d. per score, 3/- per 100	Garlicflower	1/0 per score, 6/- per 100
Broccoli	1/2 5/-	Leeks	1/2 5/-
Brussels Sprouts	9d. 3/0	Lettuce	1/2 5/-
Cabbage	9d. 3/0	Onions	1/2 4/6
— Red	9d. 3/0	Savoy	9d. 3/0

Celery, red, white and pink, per score, 1/3; per 100, 5/6.

Plants of Cucumbers, in pots, 1/3 each, 12/- per dozen; Melons in pots, 1/6 each; Tomatoes, in pots, 7d. each, 6/- per dozen, 45/- per 100; Vegetable Marrows, in pots, 9d. each, 7/6 per dozen, at their proper seasons.

STERILISED MUSHROOM SPAWN.

The Sterilised Mushroom Spawn is the result of prolonged and exhaustive trials in Spawn making and distribution. Equally adaptable to every known system of cultivation; it is universally accepted as the one true and genuine Spawn, and the solution of that long-felt want of a large number of growers who have always desired a real dependable productive Spawn. All materials used are thoroughly sterilised, and the Spawn is grown under absolute germ-proof conditions. This guarantees the Spawn 100% pure, full of run, no waste material at all, every particle should be used, every bit is good run. **No Insect Eggs. No Flies. No Weed Seeds. No Moulds of any kind or infection, or other Diseases** that the old form of Spawn, tracked into bricks or cakes, is subject to.

One Quart Carton, sufficient to spawn an area of 50 square feet, 6/9 each. **Half Quart Carton**, sufficient to spawn half the above area, 3/6 each. **Sample Size Carton**, sufficient to spawn 12 square feet, 2/- each.

Cultural instructions on Mushrooms are enclosed in each Carton.

Adce M., for making Manures for Mushroom beds, per carton, 3/8.

Seed Potatoes.

All the undernoted varieties are Hand-picked Samples. CARRIAGE PAID.

The varieties offered below are all certified stocks, grown in Scotland and passed by the Board of Agriculture for Seed purposes. They are carefully selected and rogued whilst growing, and every possible care is taken to ensure pure strains of each variety.

Those marked thus * are recommended as being immune to Wart Disease.

KIDNEY VARIETIES. SELECTED—HAND-PICKED.

	14 lbs.	28 lbs.	56 lbs.	1 cwt.
*ARRAN PEAK. Robust growing early maincrop, bearing a heavy crop of large thick kidney-shaped tubers of splendid quality	3/7	7/-	13/8	26/3

ULSTER CHIEFTAIN, a recent introduction, earlier than any other variety in commerce. It is very heavy cropping of splendid quality, and when cooked is very mealy. A good forcer..... Stock Seed	3/11	7/8	15/-	28/9

ROUND VARIETIES. SELECTED—HAND-PICKED.

*ARRAN BANNER, a round maincrop variety; good quality and heavy cropper	3/3	6/4	12/4	22/6
*DUNBAR ROVER (New), a white round, somewhat resembling GREAT SCOT but earlier; heavy cropper of good quality	3/7	7/-	13/8	26/3
*GLADSTONE. Tuber oval-shaped, with shallow eyes, which have red markings like "KING EDWARD." It is an early maincrop, a splendid cropper, and can be specially recommended for cooking quality	3/3	6/4	12/4	22/6
*GREAT SCOT, mid-season, a high-class exhibition and good all-round variety; immune	3/3	6/4	12/4	22/6
*KERR'S PINK, a heavy cropper of excellent quality; immune; highly recommended	3/3	6/4	12/4	22/6

Caldwell's Choice Flower Seeds

On account of the paper shortage, our Catalogue is restricted in size as last year, and we have decided again to include Flower Seeds in the Order Sheet only. We trust our Customers will not be inconvenienced but should they require more descriptive details will they kindly refer to previous issues of our Catalogue. If one is not to hand, we will gladly give any information on request.

GARDEN IMPLEMENTS AND SUNDRIES.

NOTE.—Owing to market fluctuations from time to time, the prices of some of the underrooted implements and Sundries are subject to variation, and will be altered (if necessary) without notice.

				Lead Wire, for fastening the labels, per lb.	—

CALDWELL'S SPECIAL
VEGETABLE AND POTATO MANURE.

The Fertilizer for all Vegetables.

DIRECTIONS FOR USE.

Potatoes.—Either enrich the whole of the soil with Special Manure before planting, or scatter it in the bottom of the drills and lightly cover with soil at time of planting. In the former case, dig in 4 to 6 ozs. per square yard, or in the latter use 2 to 3 ozs. per yard run. When earthing up apply 1 oz. around each plant, and pull up the soil over it.

Other Vegetables, including Cabbages, Sprouts, Cauliflowers, Beets, Onions, Carrots, Parsnips, Peas, Beans, etc.—Prepare the soil with 4 to 6 ozs. of Special Manure per square yard, well dug in and evenly mixed, and at intervals throughout the growing season apply 3 to 4 ozs. per square yard and water in.

Preparation of Seed Beds.—Excepting where otherwise stated, all soil may be suitably prepared for the reception of seeds by the application of 4 to 6 ozs. per square yard.

Preparation of Potting Soil.—Mix 4 lbs. of Special Manure with a barrow-load of soil.

Pot Plants.—Feed every 10 days up to forming of bloom buds with 1 tea-spoonful of Special Manure to a 10-inch pot, afterwards double the quantity. Per cwt., 30/-; 1/2-cwt., 16/-; 28 lbs., 9/-; 14 lbs., 5/-; 7 lbs., 3/-.

NATIONAL GROWMORE FERTILISER.

To meet the needs of those who are growing vegetables, the Government has arranged for the supply of a good Standard Fertiliser at a reasonable price. This contains the three important plant foods—Nitrogen, Potash and Phosphates—and is manufactured in accordance with the specification laid down by the Minister of Agriculture.

On most soils 42 lbs. of National Growmore Fertiliser should be enough for a 10 rod plot (300 square yards). As the land becomes free of crops, before sowing or planting scatter 1 lb. evenly over every 10 square yards and rake in. To give this general dressing to a 10 rod plot will take 30 lbs. This will leave 12 lbs. for giving an extra dressing to Potatoes and winter green crops.

Per cwt., 25/-; 1/2-cwt., 13/6; 28 lbs., 7/6; 14 lbs., 4/6; 7 lbs., 2/9.

GIFT VOUCHERS.

For the convenience of customers, vouchers from 5/- and upwards may be purchased from us and exchanged for Seeds or other articles. In many cases our customers request us to forward the voucher direct to their friends for them to make their own choice, and this can be done on the same day as we receive remittance. A present of this character is very suitable at Christmas or on any other occasion.

Manures, Insecticides, &c.

NOTE.—Owing to market fluctuations from time to time, the prices of some of the undernoted Manures are subject to variation, and will be altered (if necessary) without notice.

To comply with the Fertiliser Order we cannot supply more than 1 cwt. of manures marked with an asterisk * Customers requiring larger quantities will need to order again later.
